

PLL (Java Project)

You are asked to build a website for travel. Your website should meet the following minimum requirements:

- PAGE 1-> landing (main) page which shows a header, footer, latest 5 travels and latest 5 trips.
 - Header has: logo, dynamic dropdown menu for external links, login icon
 - Footer has a link to the privacy policy
- PAGE 2-> trips list: which shows all website trips.
- PAGE 3-> travels list: which shows all website travels.
- PAGE 4-> details: shows photos of the trip list of destinations and price.
- Login and registration (name, email, password)
- Privacy policy
- Admin-> requires login and provides ability to (add, edit, delete) trips and travels. And also control
- Read data from database
- Show logged in user info in all pages (image and username)
- Uses concepts of Servlets, JSP, JDBC as you find adequate.

The website design will not be considered but you should choose a template.

Number of students: 2 per project
